

Wolfe County Schools Healthy-At-School Guidance

Health Assessment at School

Parents should complete a quick health self-assessment including temperature check before sending students to school. A temperature check and health screening will be performed at school upon arrival for each student.

- **No flags or fever** - Proceed to school as normal.
- **Exposure but no symptoms** - Student should immediately go home and self-quarantine for 14 days. The student should wait in the isolation room until picked up. Parents should be encouraged to notify their health care provider as well as the local Health Department and follow their guidance. Student can participate in NTI Learning.
- **Diagnosis but not symptoms** - Student should remain home. Student may return in 10 school days if they do not develop other symptoms since the positive test. Notify the local Health Department and follow guidance. Student can participate in NTI Learning.
- **At least one symptom (fever, chills, shortness of breath/difficulty breathing, new cough, new loss of taste or smell)** - Student must immediately go home. Student should wait in an isolation room until picked up. Parent should be encouraged to contact health care provider as well as the local Health Department. Student cannot return to school until 10 days after first symptoms, no fever for 72 hours without fever reducing medication, 3 days of symptom improvement, including coughing and shortness of breath. If they have a negative COVID-19 test, they can return to school after being fever free for 72 hours without the use of fever reducing medication and have felt well for 24 hours. Can participate in NTI Learning if possible, providing student feels well enough.

Signs and Symptoms of COVID-19 Include:

Temp at or above 100.4 or subjective fever	Unexplained Rash
Dry cough	Diarrhea
Shortness of Breath	Fatigue
Loss/Change of Sense of Smell or Taste	Nausea or Vomiting
Unexplained Muscle Aches or Pains	Abdominal Pains
Sore Throat	Headache - Mild to Severe

To help prevent the spread of illness, it is recommended that you follow these important tips:

- WASH YOUR HANDS FREQUENTLY!
- USE A TISSUE WHEN YOU COUGH OR SNEEZE!
- SOCIAL DISTANCING!
- WEAR FACE COVERINGS!

We need everyone to do their part to help us all stay healthy at school!
